# Practice Test

- I will put you in groups of three or four
- All of you will work on the practice test together
- If you are not working together, I will make you start over from scratch

# **Game Day Preview**

**September 9, 2016**

**Mr. Collin**

# Unit 2 Project

- Take out your planner – you will have a project due on September 30
- This will be a summative project and will count on your progress report

# Unit 2 Project

- You work for a textbook manufacturer and will be writing a portion of a math textbook
- The textbook will have two sections (in other words, you will teach two skills)

# Unit 2 Project

- The final project will be typed either in Word or in Google Docs
  - You may print it out or e-mail it to me

# Unit 2 Project

- Each section will contain:
  - Three different ways of explaining each concept (at least one graphic)
  - Two real-life examples in which you apply the skill
    - Include and explain any limitations to using the skill in real-life situations
  - Two example problems with thorough explanations of how to solve

# Unit 2 Project

- Each section will contain:
  - At least fifteen practice problems for students
    - At least four of the fifteen must be word problems
    - At least two of the fifteen problems must be open-ended (ask the student to explain a concept)
  - Answer key for the practice problems
